EDUCATION

Vellore Institute of Technology, Bhopal **2022 - 2026**

B.Tech in Computer Science and Engineering, Specialization: E-commerce Technology

TECHNICAL SKILLS

Languages: Python, C++, SQL, HTML5, CSS3, JavaScript

Technologies/Frameworks: React.js, Node.js, Express.js, REST API, MongoDB, Flask, AI/ML

Development Tools: Git, GitHub, Postman, AWS, Docker

Core CS: OOPS, DBMS, Operating System, SDLC, Automation Scripting, Playwright

EXPERIENCE

Ethara AI — LLM Trainee Intern **April 2026**

- Processed and analyzed structured datasets using Python and SQL to support LLM training, evaluation, and data-driven model improvement.
- Evaluated AI-generated responses for accuracy, consistency, and quality, identifying performance patterns and contributing to improved model outputs.
- Performed data preprocessing, annotation, validation, and quality assurance to support reliable machine learning and LLM pipelines.

PROJECTS

Agro-Aid Smart Agriculture Platform **Dec 2024**

Tech Stack: CSS, JavaScript, REST APIs, Machine Learning, Node.js, Express.js

- Developed frontend development of a responsive, mobile-first smart agriculture platform using HTML5, CSS3, and JavaScript, integrating all backend and ML modules for a seamless user experience.
- Integrated machine learning models via RESTful APIs, achieving 95%+ accuracy in crop yield prediction and early disease detection, while reducing data latency by 30% for real-time insights.
- Structured intelligent weather forecasting and multilingual support, delivering 80%+ prediction precision for irrigation optimization and enabling real-time multi-language access for regional farmers using Google Translate.

Git Docs **Jan 2025**

Tech Stack: CSS, Next.js, Python, Flask

- Built GitDocs, an AI-powered documentation generator that converts GitHub repositories into structured technical docs or blogs, reducing documentation time by up to 85% for developers.
- Designed a responsive frontend in Next.js and a backend with Python, achieving 500+ concurrent users.
- Engineered a smart parsing engine using NLP and AST (Abstract Syntax Tree) analysis to extract key insights from over 1,000+ code files across multiple languages with 95%+ accuracy.

Foodolio — Full-Stack Food Ordering Platform **July 2025**

Tech Stack: HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB

- Developed a full-stack food ordering platform using React.js, Node.js, Express.js, and MongoDB, implementing responsive user interfaces and RESTful API integration.
- Implemented JWT-based authentication, secure user management, food listing, cart functionality, and Stripe payment integration for a complete online ordering workflow.
- Built a dedicated React.js admin dashboard for managing food items and platform operations, with Axios-based API communication and real-time user feedback.

ACHIEVEMENTS AND LEADERSHIP

President, E-Commerce Club, VIT Bhopal

- Analyzed engagement metrics from e-commerce workshops and business strategy sessions to improve student participation.
- Coordinated cross-functional teams to execute events, fostering innovation in digital business and e-commerce.

Social Volunteer (NGO) — Foundation for Rural & Agri. Dev.

- Participated in a comprehensive 7-day farmer awareness campaign across five regional villages, actively engaging with over 150 local farmers.
- Conducted hands-on demonstrations and workshops to promote sustainable organic farming practices and cost-effective vermicompost preparation methods.

Event Management Lead, Marathi Club, VIT Bhopal

- Led the end-to-end planning and execution of large-scale cultural events, coordinating operational teams for the participation of 300+ students.
- Raised event sponsorships, increasing annual festival budget by 25% and ensuring event success.

CERTIFICATIONS

- **IBM** — AI Fundamentals - Foundations for Understanding AI
- **Kaggle** — Python Programming
- **AWS** — AWS Solution Architect - Associate Certification Program
- **JPMorganChase** — Software Engineering Job Simulation
